Hiro is named after my dear friend Hiro, the wonderfully talented dyer who creates The Hare and The Crow's vibrant colourways.

I visited her studio and went home with a few skeins in delightfully bright colours so I could knit a few stitches and decide which yarn bases I wanted to design with.

The yarn tasting almost instantly turned into an urge to knit a whole shawl!

One-colour brioche is a great stitch option for highly variegated yarns. When it is worked flat, it is particularly easy to master: a perfect introduction to brioche stitch! And the bouncy texture of brioche works incredibly well with the buttery smoothness of the chainette plied merino.

Meanwhile, the suri-silk was screaming "lace please", so I indulged.

This is how Hiro became a playful texture sampler for curious knitters!

GAUGE

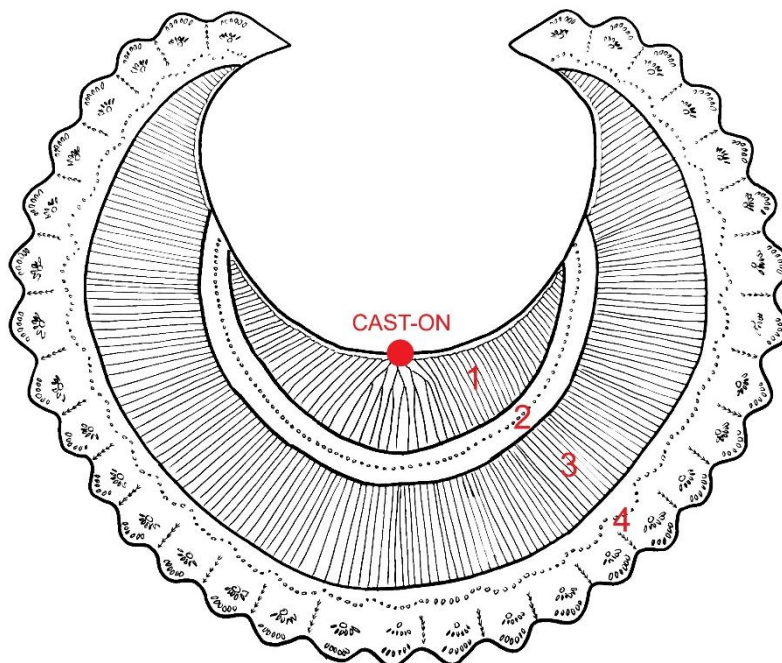

15 sts x 20 rows = 10 cm / 4" over brioche stitch after blocking

Gauge is not crucial but will affect yarn quantity requirements.

BRIOCHE ABBREVIATIONS

Basic stitches

brk: brioche knit (“bark”) = knit the stitch (that was slipped in the previous row) together with the yarn over that wraps it

sl1yo: “slip 1 yarn over” when brioche-ing.

sl1yo following a k or brk st : bring working yarn to front of work between needles, slip next stitch purlwise then bring yarn over needle (and over slipped stitch) to back of work, in position to work the following stitch.

Increase

brkyobrk: a 2-stitch increase that results in a 3-stitch cluster. Brioche-knit (leave stitch on the needle), yarn over (yarn forward under needle then over needle to back), brioche-knit into the same stitch.

NOTES

BRIOCHE TIPS

No hesitation between brioche knitting or purling when you work one-colour brioche flat: you will only need to brioche-knit, everywhere, always!

Always remember to bring yarn to the front before “sl1yo”, and make sure the yarn goes over the slipped stitch.

A complete one-colour brioche row is achieved in **2 steps**: the row is worked first on the RS, where every other stitch is worked but every other stitch is slipped. The second step is worked on the WS, where all the previously slipped sts are worked while the previously worked sts are slipped.

So all sts have been worked after working both on the RS and on the WS: it takes 2 steps for all the brioche columns to be one row higher.

Rep Row = Rep both steps of row, first step on the RS, second step on the WS.

To count your rows, count the number of sts in knit-stitch columns on the RS after completing both steps of a complete row.

“Brkyobrk” brioche increases result in **3-st clusters**: each one of these stitches needs to be worked separately on the following step in order to recreate the standard brioche “2-st rhythm”.

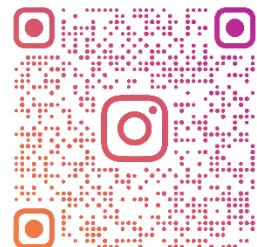

3-st clusters you make on a (RS) row are worked [sl1yo, k1, sl1yo] on the following (WS) step.

Abbreviations include step by step **how-to** for all brioche sts featured in this pattern. Read them carefully for guidance.

SINGLE STITCH CAST- ON

With the left-hand needle in your left hand, needle tip pointed to the right, drape the working yarn over the needle, leaving a 15 cm/ 6” tail for weaving in. Cross the short tail over the working yarn below the left-hand needle and hold in place with the thumb and pointer finger of your left hand. Into this loop, work the first stitches of the pattern as written. Once the required number of stitches have been worked into this loop, cinch the loop closed by pulling on the tail.
